## SECTION 3 - DESCRIPTION OF SERVICE (cont'd)

## 3.2 Product Descriptions (cont'd)

## 3.2.8 Calling Features (cont'd)

## 3.2.8.2 Call Return

Call return allows the Customer to return a call to the last incoming call whether answered or not. Upon activation, it will redial the number automatically and continue to check the number every 45 seconds for up to 30 minutes if the number is busy. The Customer is alerted with a distinctive ringing pattern when the busy number is free. When the Customer answers the ring, the call is then completed. The calling party's number will not be delivered or announced to the call recipient under any circumstances.

## 3.2.8.3 Call Screen

Call screen allows the Customer to automatically block incoming calls from up to ten Customer pre-selected telephone numbers (including numbers from which a Customer has just received a call). The list of numbers can be changed at any time. Callers whose numbers have been blocked will hear a recorded message and no usage charges will apply. The calling party's number will not be delivered or announced to the call recipient under any circumstances.

## 3.2.8.4 Call Trace

Call trace allows the Customer to dial a code to automatically request that the Company record a caller's originating telephone number and the date and time of the call as well as the date and time of the Customer initiated trace. The information is stored by the Company and disclosed only to a law enforcement agency for investigation purposes. The Customer does not receive any information regarding the origination of the calls.

## 3.2.8.5 Call Waiting

Call waiting permits the Customer engaged in a call to receive a tone signal indicating a second call is waiting; and, by operation of the switchhook, to place the first call on hold and answer the waiting call. The Customer may alternate between the two calls by operation of the switchhook, but a three-way conference cannot be established.

## SECTION 3 - DESCRIPTION OF SERVICE (cont'd)

## 3.2 Product Descriptions (cont'd)

## 3.2.8 Calling Features (cont'd)

## 3.2.8.6 Cancel Call Waiting (CCW)

Allows a Customer to dial an activation code prior to making a call, and cancel the Call Waiting (CW) feature. CCW must be activated each time the Customer wants CW canceled. Exception: Customers subscribing to a custom calling service that provides "flash privileges" such as three-way Calling, can activate the CCW feature while an incoming or outgoing call is in progress.

## 3.2.8.7 Priority Ringing

Priority ringing differentiates incoming calls from up to ten Customer pre-selected telephone numbers by signaling the Customer with a distinctive ringing pattern. If the Customer subscribes to call waiting, a distinctive tone is heard for the selected set of numbers. The last incoming call can automatically be added to the list of pre-selected numbers.

## 3.2.8.8 Remote Call Forwarding

Remote call forwarding service is an arrangement which includes the furnishing of a network address (seven or area code + seven digit telephone number) to Customer, which permits call completion to another network address. The remote call forwarding network address must be located in an exchange area.

## 3.2.8.9 Repeat Dialing

Repeat dialing permits the Customer to have calls automatically redialed when the first attempt reaches a busy number. The line is checked every 45 seconds for up to 30 minutes and alerts the Customer with a distinctive ringing pattern when the busy number and the Customer's line are free. The Customer can continue to make and receive calls while the feature is activated.

## 3.2.8.10 Speed Calling

Speed calling permits the Customer to place calls to other telephone numbers by dialing a one or two digit code rather than the complete telephone number. The feature is available as an eight-code list or thirty-code list. Either code list may include local and/or toll telephone numbers. To establish or change a telephone number in a code list, the Customer dials an activating code, receives a second dial tone and dials either a one or two digit code (for the eight code and thirty code lists, respectively) plus the telephone number.
